#SaferStopsSaferLives

Truck drivers have long faced significant challenges: rising criminal activity, demanding schedules, substandard road and stop infrastructure and limited healthy food options. These stresses directly affect drivers' health, well-being, and safety on the roads.

What to Expect from the Symposium

- Holistic Wellness Focus: We are focusing on four pillars—mental, physical, financial, and technical wellness—offering a wide range of expert-led workshops.
- Medical Screenings: Comprehensive on-site OHS medical check-ups will include optometry services, with free prescription spectacles provided if needed.

Why This Matters

Heavy vehicles make up only 3.3% of registered road users but are responsible for 9.4% of fatal crashes. Driver fatigue and other preventable risks contribute to these statistics. By focusing on drivers' overall well-being, we can reduce accidents and keep our roads safer.

Who Should Attend

- Employed Truck Drivers: Free Access
 - Two-day access (8th & 9th May)
